Prasad Reddy congratulated them and other officials.

A comprehensive strategy to plant saplings in AU is in the offing: Registrar

AU News, June: AU registrar Prof. V. Krishnamohan said that a tree planting program is being organized in Andhra University. The registrar stated that a plan has been prepared to plant many saplings in the recently developed lands in AU, and recently some people have removed the trees and are promoting poison, and only the rusts have been removed. Andhra University has never cut any trees in the past, No deletion was done. Garbage, litter, harmful dust (allergy) next to the student hostels Only the rusts were removed. Botanists and researchers suggested that these should be identified and removed earlier. There is no truth in saying that there are natural water flows in the same area. There are no natural prepared water flow channels here. Only the sewage and waste water from the hostels used to accumulate in a pit. In the past, GVMC also suggested that it should be filled and a proper sanitation system (drainage) should be established for hostels. In the past, AU medical officials have also written a line saying that as a result of this sewage pond, students are often suffering from diarrhea. In the past, permission was taken from the Forest Department to remove fallen trees during Hud Hud. We also paid the required fee to the forest

department and got the receipt for removing the fallen trees. newly, no trees were planted in the campus of the university. Many trees that had fallen down in the university were carefully moved from there and planted safely in another area. AU also took care of them. Today these trees have fully sprouted and are reviving. Providing complete safety and peaceful environment to the students in the university. It is the responsibility of the varsity to provide a peaceful environment for the students by removing only the rusts that are a base for unsocial activities near the hostels where the students live. Plans are being made to plant thousands of saplings as directed by the court to plant saplings in the campus. VC Prof PVGD Prasad Reddy said that a special program will be organized. The responsibility of preserving the plants around the varsity grounds has been taken up. Most of the plantations have been done. In a few days, saplings should be planted on a large scale or anywhere in the varsity along with the grounds. also suggested. In the same way, the registrar knows that the preservation measures will not be taken. Students will be involved in this program.
