

**M.Tech (Instrumentation And Control), Two Year (Four Semesters)**  
Scheme to be valid with effect from the admitted batch of 2019 – 2020

**SEMESTER-I**

Code	Name of the Subject	Periods/Week		Max. Marks		Total	Credits
		Theory	Lab	Ext.	Int.		
MTIE-1.1	Advanced Transducers and Measurement Technique	3	-	70	30	100	3
MTIE-1.2	Digital Signal Processing	3	-	70	30	100	3
MTIE-1.3	Elective I Advanced Process Control / Analytical Instrumentation / Computer Control of Process	3	-	70	30	100	3
MTIE-1.4	Elective II Bio-Medical Instrumentation / Electronic Instrumentation / Digital Instrumentation	3	-	70	30	100	3
MTIE-1.5	Research Methodology & IPR	3	-	70	30	100	2
MTIE-1.6	Audit Course	3	-	70	30	100	0
MTIE-1.7	Industrial Instrumentation Lab	-	3	-	100	100	2
MTIE-1.8	Microprocessors Lab	-	3	-	100	100	2
	Total	18	06	420	380	800	18

## SEMESTER-II

Code	Name of the Subject	Periods/Week		Max. Marks		Total	Credits
		Theory	Lab	Ext.	Int.		
MTIE-2.1	Microcontrollers and Embedded Systems	3	-	70	30	100	3
MTIE-2.2	Virtual Instrumentation	3	-	70	30	100	3
MTIE-2.3	Elective – III a) Industrial Communication Systems b) Robotics and Automation c) Power Plant Instrumentation		-	70	30	100	3
MTIE-2.4	Elective – IV a) Advanced Sensors b) Piping and Instrumentation c) Steel Plant Instrumentation	3	-	70	30	100	3
MTIE-2.5	Audit Course	3	-	70	30	100	0
MTIE-2.6	Process Control Lab	-	3	-	100	100	2
MTIE-2.7	Virtual Instrumentation Lab	-	3	-	100	100	2
MTIE-2.8	Mini Project With Seminar	-	3	-	100	100	2
	Total	15	9	350	450	800	18

### SEMESTER-III

Code	Name of the Subject	Periods/Week		Max. Marks		Total	Credits
		Theory	Lab	Ext.	Int.		
MTIE-3.1	Elective V a) Fiber Optics and Laser Instrumentation b) Fuzzy Logic and Neural Networks and Control / Environmental Analysis Instrumentation	3	-	70	30	100	3
MTIE-3.2	Open Elective  VLSI Design	3	-	70	30	100	3
MTIE-3.3	Dissertation- I / Industrial Project	-	-	-	100	100	10
	Total	6		140	160	300	16

### SEMESTER-IV

Code	Name of the Subject	Periods/Week		Max. Marks		Total	Credits
		Theory	Lab	Ext.	Int.		
MTIE-4.1	Dissertation- II	-	-	70	30	100	16
	Total			70	30	100	16

**Note:**

1. At the end of 3rd semester project review is conducted by HOD with the committee consisting of the HOD, Chair Person of BOS and the Guide. In the Affiliated Colleges, Project (Preliminary) will be evaluated by concerned HOD and the thesis Guide of their respective colleges.
2. At the end of the 4th semester there will be a final viva voce for the project work conducted by the HOD with the committee consisting of HOD, Chair Person of BOS, the Guide and an External examiner nominated by the university.

Audit Course 1 & 2

1. English for Research Paper Writing
2. Disaster Management
3. Sanskrit for Technical Knowledge
4. Value Education
5. Constitution of India
6. Pedagogy Studies
7. Stress Management by Yoga
8. Personality Development through Life Enlightenment Skills.

## **MTIE-1.1 Advanced Transducers and Measurement Technique**

Transducer fundamentals, Classification of transducers, General transducer characteristics, Resistance- Capacitance, Inductance- reluctance- Piezoelectric Magnetostrictive- Hall effect- Photo electric type of transducers and their applications. Smart Transducers- Transducers for Bio-Medical applications- tactile sensors-MEMS and their applications.

Measurement of Force, Acceleration, Strain and Torque. Design of Electrical, Optical, & MEMS Accelerometers. Design of Gyroscopes.

Pressure measurement: Elastic types-Resistive- Capacitive and Inductive pressure pickups. Piezoelectric- Piezoresistive types. Vacuum measurement: McLeod gauges-Ionization gauges- Alphatron gauge. High Pressure measurement. Force balance and Motion balance type transmitters – P/I and I/P converters. IC pressure sensors and calibration of pressure measuring devices.

Temperature measurement: Filled-in thermal systems- Bimetallic thermometers - RTD, Thermistor, Thermocouple - Radiation and Optical pyrometers - Digital IC thermometers - Accuracy, errors and compensation.

Flow measurement: Head flow meters- types, Area flow meters– Rotameter bypass rotameter- Turbine meter. Electromagnetic flowmeter – Principle – DC AC and pulsed type. Ultrasonic flow meters – Principles – transit time – Doppler shift – beam deflection– Cross correlation flowmeters. Vortex flowmeters -Coriolis flowmeters- Solid flow measurement-conveyor belt type. Installation and Calibration procedures of various flowmeters

Level Measurement: Conductive and Capacitive methods –Ultrasonic, Microwave and RADAR level sensors - Solid level measurement by Paddlers method. Capacitance method for powder level measurement. Density, Viscosity and PH measurement.

2. D. V.S.Murthy, Transducers in instrumentation, Prentice Hall, 1995.
3. Ernest. O. E. Doebelin, “Measurement Systems”, McGraw-Hill publishing company, 1990.
4. James.W.Dally, “Instrumentation for Engineering Measurement”, John Wiley & Sons, Inc., 1993.
5. Bela G. Liptak, Process measurement and Analysis-Instrument Engineers’ Handbook- Vol. I Third edition- Butterworth Heinemann publishing company

## **MTIE-1.2      Digital Signal Processing**

### **Linear Shift Invariant Systems**

Signals, systems and signal processing, discrete time signals, discrete time systems, analysis of linear time invariant systems, classification of discrete time systems, block diagram and signal flow graphs, structures for realization for IIR systems, structures for realization of FIR systems.

### **Discrete Fourier Transforms**

Introduction, Circular shift and circular symmetries of a sequence, properties of DFT, linear convolution, circular convolution, performing linear convolution using DFT, sectioned convolution, Fast Fourier Transforms, Decimation – in time FFT, Decimation –in- frequency FFT, computation of IDFT through FFT.

### **FIR Filters**

LTI systems as frequency selective filters, FIR filters, characteristics of FIR filters with linear phase, frequency response of linear phase FIR filters, Design techniques for linear phase FIR filters, Fourier series method of FIR filter design, windows, FIR filter design using windows, Design of FIR filters by frequency sampling technique.

### **IIR Filters**

Introduction, Impulse Invariant transformation, Bilinear Transformation, specifications of the low pass filter, design of low pass digital Butterworth filter, Design of low pass digital Chebyshev filter, Frequency transformation.

### **Finite Word Length Effects in Digital Filters**

Introduction, representation of numbers in Digital system, Types of arithmetic in digital systems, quantization by truncation and rounding, quantization of input data, quantization of filter coefficients, product quantization error, limit cycles in recursive systems.

### **Text Books**

1. John G Proakis,” Digital Signal Processing: Principles, Algorithms and Applications,” Pearson Education, 4<sup>th</sup> Edition 2007.
2. Alan V Oppenheim, Ronald W Schaffer , “Digital Signal Processing,” PHI learning Pvt. Ltd, 1975

### **References**

2. P.RameshBabu,” Digital Signal Processing ,” Scitech Publications.

## MTIE-1.3 Elective I (A) Advanced Process Control

Review of systems: Review of first and higher order systems, closed and open loop response. Response to step, impulse and sinusoidal disturbances.

Design aspects: Process characteristics-process equation, process load, process lag, self-regulation; Control system parameters- Error, variable range, Control parameter range, control lag, dead time, cycling.

Control valve types-linear, equal percentage and quick operating valves. Flow equation through valves-viscosity correction, rangeability, turn down, cavitation and flashing of valves, Design of valves.

Optimum controller settings: evaluation criteria-1/4 decay ratio, IAE, ISE,ITAE; Controller tuning and process identification--open loop and closed loop tuning methods--Ziegler-Nichols and Cohen –oon tuning methods.

Special control techniques: Advanced control techniques, cascade, ratio, feed forward, adaptive control, selective controls, smith predictor, internal model control.

Multivariable control – examples of distillation column and boiler control systems.

Intelligent control: Model based controllers- adaptive controller-model reference adaptive control-self tuning regulator -adaptive controllers-optimal control-predictive control

Expert systems- expert controller-Fuzzy logic systems-fuzzy controller-Fuzzy logic tools-Artificial neural networks-perceptron-neural controllers.

## MTIE-1.3 Elective I(B) Analytical Instrumentation

Design, construction and application of UV, Visible and IR spectroscopy, X-ray absorption and fluorescence spectrometry- X-ray diffraction methods of analysis – energy dispersion analysis —

Radiation sources -  $\alpha$ ,  $\beta$ ,  $\gamma$ , sources – detectors –Geiger Mueller counter – proportional counters – Ionization chamber, scintillation counter and Solid-State Detectors.

Nuclear Magnetic Resonance (NMR) spectroscopy – Principles of operation and constructional details of NMR spectrophotometer – Broad band spectrometer – Applications. Principles and applications of Electron Spin Resonance (ESR) spectrometer. Mass spectrometry – principle of operation – Co-analyzer – Commercial mass spectrometer.

Flue Gas and Water Analyzers: Flue gas analysis is using thermal conductivity principle – Cathetometer – Oxygen analyzer using paramagnetic, depolarization principles – Zirconium oxide cells – CO<sub>x</sub>, SO<sub>x</sub>, NO<sub>x</sub> Measurement-combustibles analyzer – Different types of Dust and Smoke meters – Visible Emission Monitor – Remote sensing laser instruments

Water purity meter – Conductivity meters – Steam purity measurement – Dissolved oxygen meter using polarographic principle – Sodium analyzer – Silica analyzer.

Gas Chromatography: Basic Principle and construction –Different types of columns – Detectors – Recorders and associated equipment. Industrial and laboratory applications of gas Chromatography.

Liquid Chromatography: Salient features of liquid chromatography Ionizing electrodes - pH and ion sensitive electrodes, ISFET and chemical sensors. Applications of high precision liquid chromatography. Current trends in analysis instrumentation.

5. B.G. Liptak, Instrumentation in Process Industries Suppl. To Vol.I& III Chilton Book Co., 1974.

## **MTIE-1.3 Elective I (C) Computer Control of Process**

Introduction: objective of automation-basic functions- Historical developments of control systems-current trends in computer control of process plants-centralized-distributed and hierarchical control systems-intelligent control.

Supervisory control and data acquisition systems: -channel scanning-conversion to engineering units-Data Processing-Distributed SCADA system-Remote terminal UNIT-communication module- special software facilities

Direct Digital control:DDC structure- DDC software-position algorithm-velocity algorithm-position vs. velocity algorithm- cascade control-ratio control-multivariable control  
Programmable controllers:advantages-principles of operation-architecture of programmable controllers-input/output system-programming devices.

Programming of PLCs: ladder diagrams-special functions-data transfer and data manipulation operations-arithmetic operations-flow control operations.Boolean mnemonics-functional blocks-English like statement-applications.

Distributed Digital Control: introduction-distributed vs. centralized-advantages of distributed control-Functional requirements of DCS-System architecture-distributed control sub systems-local field station-library of functions-continuous process displays-atc/sequence operating displays-process upset displays- communication options in distributed control systems-configuration- some popular distributed control systems.

Modeling and simulation for plant automation: definitions-need of modeling-uses- model building-model evaluation-applications and future perspectives

2. Instrument engineer's handbook B.G. Liptak 3rd edition.
3. Curtis.D.Johnson: Process control instrumentation technology
4. Patrinabis,D, Principles of process control.

## **MTIE-1.4 Elective II(A) Bio-Medical Instrumentation**

Basic Concepts of Bio-Medical Instrumentation: Terminology – Generalized medical instrumentation system – Measurement constrains – Classification – Interfacing and modifying inputs – Bio statistics – Static and dynamic characteristic – Regulation of medical devices – Electrical safety in medical environment.

Basic Sensors and Signal Processing: Displacement measurements – Resistive sensors – Bridge circuits – Inductance, capacitance and piezo electric sensor – Temperature measurements – Thermocouples – Radiation thermometry – Fiber optic temperature sensors – Optical measurements – Op-amp circuits – Phase sensitive demodulation – Oscillographic, galvanometric and potentiometric recorders – Microcomputers in bio medical instrumentation.

Bio-potentials and Measurements: Electric activity and excitable cells – Functional organization of peripheral nervous system. ENG, EMG, ECG, EEG & MEG – Bio-potential electrodes – Electrolyte interface. Polarization – Body surface recording electrodes – Electrodes for electric simulation of tissues – Practical hints for using electrodes – Bio potential amplifiers.

Blood pressure, Flow and Sound Measurement: Direct and indirect blood pressure measurement and analysis – Bandwidth requirement – Typical waveforms – Phonocardiography – Electromagnetic and ultrasonic flow meters – Photo plethysmography.

Clinical Measurement and Imaging Systems: Respiratory instruments – Transducers, Spiro meters, pulmonary measurements and instruments – Oxymeter – Laser application in medicines – Pulsed ruby, NdYag, Argon and Carbon-dioxide lasers – X-ray machines – Fluoroscopic machines, thermogram equipments – Ultrasonic imaging – Scanning methods and applications – Image evaluation and processing in medical field – Artificial assist devices.

5. Cromwell. L.FredJ.Webbell, “Bio medical Instrumentation and measurements”, Prentice Hall, 1995.

## **MTIE-1.4 Elective II(B) Electronic Instrumentation**

**ANALOG INSTRUMENTATION:** Electronic voltmeters VTVM, TVM, FETVM Voltmeters, electronic – multimeters differential voltmeters.

**CATHODE RAY OSCILLOSCOPE:** Block diagram vertical and horizontal amplifiers, sweep circuits delay line, dual trace oscilloscopes. Q-meters, vector – voltmeters, instruments for generating and analyzing wave forms, square wave, pulse, standard-signal, random noise and function generators wave analysers spectrum analysers, wave-meters.

**DIGITAL INSTRUMENTS:** Digital voltmeters, digital frequency meters, digital display method and units, digital read out oscilloscopes, data acquisition system.

### **REFERENCE BOOKS**

1. Modern electronic instrumentation measurements techniques by Helfrick and cooper.
2. A course in electrical and electronic measurement and instrumentation by A.K.Shawney.
3. Electronic measurements and instrumentation by Rajendra Prasad.

## **MTIE-1.4 Elective II(C) Digital Instrumentation**

Introduction: Digital codes – Memory devices – Basic building blocks – Gates, FF and counters – Discrete data handling – Sampling – Sampling theorem – Aliasing errors – Reconstruction – Extrapolation – Synchronous and asynchronous sampling.

Digital methods of measurements Review of A/D, D/A techniques – F/V and V/F conversion techniques – Digital voltmeters and multimeters – Automation and accuracy of digital voltmeters and multimeters – Digital phase meters – Digital tachometers – Digital frequency, period and time measurements – Low frequency measurements – Automatic time and frequency scaling – Sources of error – Noise – Inherent error in digital meters, hidden errors in conventional ac measurements – RMS detector in digital multimeters – Mathematical aspects of RMS.

Digital display & recording devices: Digital storage oscilloscopes – Digital printers and plotters – CDROMS – Digital magnetic tapes, dot matrix and LCD display CROs, colour monitor, digital signal analyzer and digital data acquisition.

Current trends in digital instrumentation: Introduction to special function add on cards – Resistance card – Input and output cards – Counter, test and time of card and digital equipment construction with modular designing; interfacing to microprocessor, micro controllers and computers - Computer aided software engineering tools (CASE) – Use of CASE tools in design and development of automated measuring systems – Interfacing IEEE cards – Intelligent and programmable instruments using computers.

## **MTIE-1.5 Research Methodology & IPR**

Meaning of research problem, Sources of research problem, Criteria Characteristics of a good research problem, Errors in selecting a research problem, Scope and objectives of research problem.

Approaches of investigation of solutions for research problem, data collection, analysis, interpretation, Necessary instrumentations

Effective literature studies approach, analysis

Plagiarism, Research ethics,

Effective technical writing, how to write report, Paper

Developing a Research Proposal, Format of research proposal, a presentation and assessment by a review committee

Nature of Intellectual Property: Patents, Designs, Trade and Copyright.

Process of Patenting and Development: technological research, innovation, patenting, development. International Scenario: International cooperation on Intellectual Property. Procedure for grants of patents, Patenting under PCT.

Patent Rights: Scope of Patent Rights. Licensing and transfer of technology. Patent information and databases. Geographical Indications.

New Developments in IPR: Administration of Patent System. New developments in IPR; IPR of Biological Systems, Computer Software etc.

Traditional knowledge Case Studies, IPR and IITs.

**MTIE-1.6 Audit Course**

## **MTIE-2.1 Microcontrollers and Embedded Systems**

Architecture of 8/16 bit microcontrollers:8748 micro controller architecture: program memory – data memory – I/O ports – BUS Ports, Test and interrupt inputs- instruction set and programming.

8051 Microcontroller family - architecture, parallel and serial I/O - instruction set – programming and hardware interfacing techniques

8096 Microcontroller – CPU, RAM space, memory space, high speed input & outputs, analog inputs - serial I/O ports - parallel I/O ports and watch dog timer.

The concept of embedded systems design. Embedded microcontroller cores, embedded memories. Examples of embedded systems.

Technological aspects of embedded systems: interfacing between analog and digital blocks, signal conditioning, digital signal processing. Sub-system interfacing, interfacing with external systems, user interfacing.

Software aspects of embedded systems: real time programming languages and operating systems for embedded systems.

## **MTIE-2.2 Virtual Instrumentation**

### **Introduction to Virtual Instrumentation**

History of Instrumentation systems, Evolution of Virtual Instrumentation, premature challenges, programming requirements, Drawbacks of recent approaches, conventional Virtual Instrumentation, Distributed Virtual Instrumentation, Virtual Instrumentation versus Traditional Instruments, Advantages.

### **Introduction to LabVIEW**

Introduction, Advantages of LabVIEW, software Environment, Front panel, Block diagram, Data flow programming.

### **Programming Concepts of Virtual Instrumentation**

VI & sub VI, loops, shift registers, feedback node, formula node, case and sequence structures, arrays, clusters.

### **Output Verification Tools**

Waveform Graphs, Waveform charts, files I/O, local and global variables.

### **Data Acquisition**

Introduction, transducers, Signals, Signal conditioning, DAQ Hardware configuration, DAQ Hardware, Analog inputs, Analog outputs, counters, Digital I/O, DAQ software architecture, DAQ assistant.

### **IMAQ Vision**

Vision basics, Image processing and analysis, particle analysis, Machine vision, Machine vision hardware and software, building a complete Machine Vision system, Acquired and displaying images with NI-IMAQ driver software, Image processing tools and functions in IMAQ vision, Machine Vision applications.

### **Textbooks**

1. S. Sumathi, P. Surekha, "Virtual Instrumentation with LabVIEW," ACME Learning Pvt. Ltd 2007.

## **MTIE-2.3 Elective – III(A) Industrial Communication Systems**

Introduction: importance of communication in industry, hierarchy of factory automation, evolution of technology in control systems. Local area networks-network topologies-Metropolitan area networks-Wide area networks-Wireless networks

Network software: Reference models-The OSI reference model-TCP/IP reference model-comparison of models- Critiques of OSI and TCP/IP models regarding implementation and success.

Transmission media: magnetic media- twisted pair-base band coaxial cable-broadband coaxial cable-Fiber optic networks: multi-mode and single mode fibers-Transmission of light through fiber-fiber cables. Fiber optic networks- comparison of fiber optics and copper wire.

Physical layer options: Network topologies, interface standards, RS232,RS 422,RS 485,IEEE 488(GPIB): Talkers, Listeners and controllers, Connector and signal lines, Data bus, Handshake lines, Handshaking, Control bus, Data bus transfer timing, Physical connection, Electrical characteristics, IEEE 488.2, IEEE 488.2 control sequences and protocols, HS 488, Handshake, HS 488 data transfer flow control, System configuration effects on HS 488, HS 488 configuration messages.

HART Communications: HART communication technique, Cable specifications, HART commands, Benefits of HART,Token buses and rings: IBM token ring protocol, Function of a bridge, Function of a repeater and splitter.Ethernet or CSMA/CD: MAC protocol, Different ways of implementation, Vital statistics. Moving up the layers: Function of a router, Gateways, Remote file request, FDDI, Typical enterprise network.

Field bus and device networks: Introduction, The CIM pyramid, Field bus characteristics, Field bus configuration, Advantages of Field bus, Connecting Field bus to PLC and other devices, Connection with analog signals, Intelligent/ smart hybrid signals, pure digital communication, open system and interoperability, Field bus requirements, types of Field buses.

Foundation field bus: Architecture, Physical layer, wire media characteristics, communication, data link layer, Field bus media access control, Data Link Control, Objective oriented design, Application layer, System and Network management, Function block application process, field bus benefits.

1995.

4. B.G. Liptak, Process software and digital networks, 3rd Edition, CRC press, Florida.

### **MTIE-2.3 Elective – III(B) Robotics and Automation**

Introduction: Geometric configuration of robots – Manipulators – Drive systems – Internal and external sensors – End effectors – Control systems – Robot programming languages and applications – Introduction to robotic vision.

Robot arm kinematics : Direct and inverse kinematics – Rotation matrices – Composite rotation matrices – Euler angle representation – Homogenous transformation – DenavitHattenberg representation and various arm configurations.

Robot arm dynamics: Lagrange – Euler formulation, joint velocities – Kinetic energy – Potential energy and motion equations –GeneralisedD’Alembert equations of motion.

Planning of manipulator trajectories: General consideration on trajectory planning- joint interpolation & Cartesian path trajectories.

Control of robot manipulators:PID control - Computed torque technique – Near minimum time control – Variable structure control – Non-linear decoupled feedback control – Resolved motion control and adaptive control.

Industrial robots: Industrial robots for welding, painting and assembling-Remote controlled robots- robots for nuclear, chemical and thermal plants- industrial automation-typical examples of automated industries.

5. Groover M. P. Mitchell Wesis., ‘Industrial Robotics Technology Programming and Applications’, Tata McGraw-Hill, 1986.

## **MTIE-2.3 Elective – III(C) Power Plant Instrumentation**

Basics of power plant operation- major input variables, major control variables

Automation strategy: Distributed system structure, automatic boiler control, diagnostic function and protection.

Automatic boiler control- basic boiler operation- block diagram, ID,FD fans, Unit type boilers

Combustion controls; series-parallel operation, hardware schemes, optimizing control for air-flow, loss-efficiency curves, oxygen/CO trimming control, comparison,

Drum level control: feed water control, drum level control, steam flow control, two-element control, and three-element control

Furnace pressure control, steam temperature control, super heater control, Advanced control aspects: Adaptive variable pressure control, combined plant control

Digital electrohydraulic governor: block diagram, basic functions, turbine speed control, valve actuation. Automatic startup systems- block diagram, steps in turbine speed control, thermal stress control.

Man-Machine interface: types of displays, Software system-online functions, graphic display, Application functions

4. Bela.G.Liptak: Instrumentation Engineers Hand book

## **MTIE-2.4 Elective – IV(A) Advanced Sensors**

Chemical Sensors: Amperometry-Potentiometry-Conductivity sensors- Semi conductive sensors-MEMSsensors. Materials for Sensors-Electrical conducting materials- Ionic conductors-zirconia-alumina-NASICON. Semiconductor materials-titania-tin oxide-zinc oxide. Insulating materials- Ferroelectric Materials-Negative temperature ceramic thermistors.

Thin and Thick film sensors: Thick film Processes-Thin film processes- Thin film deposition methods- thin film characterization methods-thin film delineation techniques-compatibility issues- Longmuir-Blodgett films for sensor materials-film forming apparatus-dipping-ion sensors-gas sensors. Applications of thin and thick film sensors.

Biosensors:Colorimetric- Optical- Potentiometric- Amperometric- Conductometric-Semiconductor- Mechanical and Molecular electronic based sensors. Chemiluminescence based biosensors. Applications of biosensors in medical and health care- food and agricultural-Industrial process and environmental monitoring.

Integrated Magnetic Sensors: Overview of magnetic field sensor Technology-AMR-GMR-SQUIDS-Optoelectronic MFS- Semiconductor magnetic effects-materials and figure of merit-Standard MFS technologies-limitations and applications.

Sensor Applications: Automotive Sensors-Environmental Sensors-Sensors for Medical Diagnosis and patient monitoring-Aerospace sensors.

## **MTIE-2.4 Elective – IV(B) Piping and Instrumentation**

Types of flow sheets, Flow sheet Presentation, Flow Sheet Symbols, Process flow diagram-  
Synthesis of steady state flow sheet - Flow sheeting software.

P & I D objectives, guide rules, Symbols, Line numbering, Line schedule, P & I D  
development, typical stages of P & I D.

P & I D for rotating equipment and static pressure vessels, Process vessels, absorber,  
evaporator.

Control System for Heater, Heat exchangers, reactors, dryers, Distillation column, Expander.

Applications of P & I D in design stage - Construction stage - Commissioning stage -Operating  
stage - Revamping stage - Applications of P & I D in HAZOPS and Risk analysis.

## **MTIE-2.4 Elective – IV(C) Steel Plant Instrumentation**

Basics of steel production; mill zones: iron zone, steel zone, mill zone, utility zone  
Automation strategy: different levels, input, output data.

Iron zone: supervisory control, direct digital control; instrumentation for-raw material handling, coke oven, sinter plant, Blast furnace; input/output data, control architecture.

Steel zone: Automation for- LD converters, continuous casting, soaking pit control, blooming mill controls.

Utility zone: instrumentation for-Gas distribution, liquid fuel distribution, power generation, steam generation, compressed air generation

Instrumentation for water management system. Pollution control and monitoring for steel plant environment.

**MTIE-2.5 Audit Course**

## **MTIE-3.1 Elective V (A) Fiber Optics and Laser Instrumentation**

Principles of light propagation through fiber- Different types of fibers and their properties– transmission characteristics of optical fibers - absorption losses-scattering losses-dispersion. Fabrication of fiber components- Optical fiber as cylindrical waveguide, fiber-optic polarizer.

Fiber optic sensors – Fiber optic communication and instrument system – Advantages of optical communications – Different types of Modulators – Detectors – Fiber optic communication setup – Applications in instrumentation. Distributed fiber-optic sensors-OTDR and OFDR principles in temperature measurement.

Characteristics and fundamentals of lasers – Laser emission and light amplification – Properties of laser beams – Laser modes – Resonator configuration – Q-switching mode locking – Single frequency operation. Types of lasers – Gas lasers – Solid lasers – liquid lasers – semiconductors lasers.

Lasers for Analysis – Laser application in holographic microscopy – holographic interferometer and applications-Holography for non-destructive testing – Medical applications of lasers.

Industrial application of Lasers – Measurement of distance and length, velocity, acceleration, atmospheric effects, sonic boom, pollutants, Material processing, laser heating, melting, scribing, splicing, material removal, calculation of power requirement of laser for material processing.

4. D.C. O Shea and W. Russel Callen, Introduction to lasers and their Applications, Addison Wesley, 1978.
5. BS. Wherrelt, Laser Advances and Applications, John Wiley, 1979.
6. W.O.N. Guimarass and A. Mooradian, Lasers and Application Springer Verlag, 1981.

## **MTIE-3.1 Elective V(B) Fuzzy Logic and Neural Networks and Control**

Neural Networks: Introduction - Biological neurons and their artificial models – Learning, adaptation and neural networks learning rules types of neural networks – Single layer, multiplayer – Feed forward, feedback networks; back propagation – Learning and training – Hop field network.

Neural Networks in Control: Neural network for non-linear systems – Schemes of neuro control – System identification forward model and inverse model – Indirect learning neural network control applications – Case studies.

Fuzzy Logic: Fuzzy sets – Fuzzy operation – Fuzzy arithmetic – Fuzzy relations – Fuzzy relational equations – Fuzzy measure – Fuzzy functions – Approximate reasoning – Fuzzy propositions – Fuzzy quantifiers – If-then rules.

Fuzzy Logic Based Control: Fuzzy Controllers: Preliminaries Fuzzy sets in commercial products basic construction of fuzzy controller Analysis of static properties of fuzzy controller Analysis of dynamic properties of fuzzy controller simulation studies case studies fuzzy control for smart cars.

Neuro Fuzzy and Fuzzy Neural Controllers: Neuro fuzzy systems: A unified approximate reasoning approach Construction of rule bases by self-learning: System structure and learning algorithm. A hybrid neural network based Fuzzy controller with self-learning teacher. Fuzzified CMAC and RBF network based self-learning controllers.

5. Driankov, Hellendroon, “Introduction to Fuzzy Control”, Narosa Publishers.
6. Farin Wah S.S., Filev, D. Langari, R. “Fuzzy control synthesis and analysis”, John Wiley and Sons, 2000.

## **MTIE-3.1 Elective V(C) Environmental Analysis Instrumentation**

Electromagnetic radiation, Characteristics - Interaction of e.m. radiation with matter - Spectral methods of analysis - absorption spectroscopy – Beer's law - radiation sources - monochromators and filters - diffraction grating - ultraviolet spectrometer - single beam and double beam instruments.

Particles emitted in radioactive decay - nuclear radiation detectors - injection chamber - Geiger - Muller counter - proportional counter - scintillation counter - Semiconductor detectors.

Measurement techniques for water quality parameters - conductivity - temperature - turbidity. Measurement techniques for chemical pollutants - chloride - sulphides - nitrates and nitrites - phosphates - fluoride - phenolic compounds.

Measurement techniques for particulate matter in air. Measurement of oxides of Sulphur, oxides of nitrogen unburnt hydrocarbons, carbon-monoxide, dust mist and fog.

Noise pollution measurement of sound, tolerable levels of sound. Measurement of sound level. Measurement techniques for soil pollution.

G. N. Pandey and G.C. Carney, Environmental Engineering, Tata McGraw-Hill, 1989.

## **MTIE-3.2 Open Elective VLSI Design**

Introduction: Introduction to IC technology-MOS, PMOS, NMOS, CMOS, BiCMOS Technologies. Fabrication, Fabrication sequence - Oxidation, Lithography. Diffusion, Ion implantation, Metallization, Encapsulations. Basic Electrical Properties of MOS and BiCMOS circuits - $I_{ds}$ - $V_{ds}$  relationships, MOS transistor Threshold voltages, figure of merit, NMOS inverter, and CMOS inverter analysis and design-BiCMOS inverters.

VLSI circuit Design Processes: VLSI design flow, MOS layers, Stick diagrams, Design rules and layout,  $2\mu\text{m}$  CMOS Design rules for wires, contacts and transistors-Layout diagrams for NMOS and CMOS inverters and gates- Scaling of MOS circuits- Limitations of scaling.

Gate level Design: Logic gates and other complex gates, switching logic-alternate gate circuits-Basic circuit concepts-sheet resistance  $R_s$  and its concept to MOS- Area capacitance units-calculations- $\delta$  delays- Driving large capacitance loads- Wiring capacitive loads- wiring capacitances- Fan-in and fan-out- choice of layers.

Semi-custom Integrated circuit Design: Design approach of semi-custom and Full-custom ASICs, Standard Cell design, Programmable Logic Array, Programmable Array Logic, programmable gate arrays- CPLDs, FPGAs - etc.

VHDL Synthesis: Circuit Design flow- Circuit synthesis- Simulation-Layout-Design capture tools- Design verification tools- Test principles- Test vector generation, scan based techniques, Boundary scan test(BST), Built-in-self Test(BST) techniques, Testing and qualification.

2. Principles of CMOS VLSI Design: Weste and Eshraghian—Pearson Education-1999.
3. Introduction to VLSI circuits and systems-John P.Uyemura-JohnWiley-2003
4. Modern VLSI Design- Wayne Wolf, Pearson Education, 3<sup>rd</sup> Edition, 1997.
5. Digital Integrated Circuits: A Design Perspective- J. Rabaey-Prentice Hall India, 1997.

## **Audit Course**

### **ENGLISH FOR RESEARCH PAPER WRITING**

Planning and Preparation, Word Order, breaking up long sentences, Structuring Paragraphs and Sentences, Being Concise and Removing Redundancy, Avoiding Ambiguity and Vagueness.

Clarifying Who Did What, Highlighting Your Findings, Hedging and Criticizing, Paraphrasing and Plagiarism, Sections of a Paper, Abstracts. Introduction.

Review of the Literature, Methods, Results, Discussion, Conclusions, The Final Check.

Key skills are needed when writing a Title, key skills are needed when writing an Abstract, key skills are needed when writing an Introduction, skills needed when writing a Review of the Literature.

Skills are needed when writing the Methods, skills needed when writing the Results, skills are needed when writing the Discussion, skills are needed when writing the Conclusions

Useful phrases, how to ensure paper is as good as it could possibly be the first- time submission

## **DISASTER MANAGEMENT**

Introduction Disaster: Definition, Factors and Significance; Difference Between Hazard and Disaster; Natural and Manmade Disasters: Difference, Nature, Types and Magnitude.

Repercussions of Disasters and Hazards: Economic Damage, Loss of Human and Animal Life, Destruction of Ecosystem. Natural Disasters: Earthquakes, Volcanisms, Cyclones, Tsunamis, Floods, Droughts and Famines, Landslides and Avalanches, Man-made disaster: Nuclear Reactor Meltdown, Industrial Accidents, Oil Slicks and Spills, Outbreaks of Disease and Epidemics, War And Conflicts.

Disaster Prone Areas in India Study of Seismic Zones; Areas Prone to Floods and Droughts, Landslides and Avalanches; Areas Prone to Cyclonic And Coastal Hazards With Special Reference To Tsunami; Post-Disaster Diseases And Epidemics.

Disaster Preparedness and Management Preparedness: Monitoring of Phenomena Triggering A Disaster Or Hazard; Evaluation Of Risk: Application Of Remote Sensing, Data From Meteorological And Other Agencies, Media Reports: Governmental And Community Preparedness.

Risk Assessment Disaster Risk: Concept And Elements, Disaster Risk Reduction, Global And National Disaster Risk Situation. Techniques Of Risk Assessment, Global CoOperation In Risk Assessment And Warning, People's Participation In Risk Assessment. Strategies for Survival.

Disaster Mitigation Meaning, Concept And Strategies Of Disaster Mitigation, Emerging Trends In Mitigation. Structural Mitigation And Non-Structural Mitigation, Programs Of Disaster Mitigation In India.

## **SANSKRIT FOR TECHNICAL KNOWLEDGE**

- Alphabets in Sanskrit.
- Past/Present/Future Tense.
- Simple Sentences
  
- Order
- Introduction of roots
- Technical information about Sanskrit Literature
  
- Technical concepts of Engineering-Electrical, Mechanical, Architecture, Mathematics

### **Reference Books**

1. "Abhyaspustakam" – Dr. Vishwas, Samskrita-Bharti Publication, New Delhi
2. "Teach Yourself Sanskrit" Prathama Deeksha-VempatiKutumbshastri, Rashtriya Sanskrit Sansthanam, New Delhi Publication
3. "India's Glorious Scientific Tradition" Suresh Soni, Ocean books (P) Ltd., New Delhi.

## VALUE EDUCATION

- Values and self-development –Social values and individual attitudes. Work ethics, Indian vision of humanism.
- Moral and non- moral valuation. Standards and principles.
- Value judgements
  
- Importance of cultivation of values.
- Sense of duty. Devotion, Self-reliance. Confidence, Concentration. Truthfulness, Cleanliness.
- Honesty, Humanity. Power of faith, National Unity.
- Patriotism. Love for nature, Discipline.
  
- Personality and Behavior Development - Soul and Scientific attitude. Positive Thinking. Integrity and discipline.
- Punctuality, Love and Kindness.
- Avoid fault Thinking.
- Free from anger, Dignity of labour.
- Universal brotherhood and religious tolerance.
- True friendship.
- Happiness Vs suffering, love for truth.
- Aware of self-destructive habits.
- Association and Cooperation.
- Doing best for saving nature.
  
- Character and Competence –Holy books vs Blind faith.
- Self-management and Good health.
- Science of reincarnation.
- Equality, Nonviolence, Humility, Role of Women.
- All religions and same message.
- Mind your Mind, Self-control.
- Honesty, Studying effectively.

## CONSTITUTION OF INDIA

- History of Making of the Indian Constitution:
  - History
  - Drafting Committee, (Composition & Working)
- Philosophy of the Indian Constitution:
  - Preamble
  - Salient Features
- Contours of Constitutional Rights & Duties:
  - Fundamental Rights
  - Right to Equality
  - Right to Freedom
  - Right against Exploitation
  - Right to Freedom of Religion
  - Cultural and Educational Rights
  - Right to Constitutional Remedies
  - Directive Principles of State Policy
  - Fundamental Duties.
- Organs of Governance:
  - Parliament
  - Composition
  - Qualifications and Disqualifications
  - Powers and Functions
  - Executive
  - President
  - Governor
  - Council of Ministers
  - Judiciary, Appointment and Transfer of Judges, Qualifications
  - Powers and Functions
- Local Administration:
  - District's Administration head: Role and Importance,
  - Municipalities: Introduction, Mayor and role of Elected Representative, CEO of Municipal Corporation.
  - Pachayati raj: Introduction, PRI: ZilaPachayat.
  - Elected officials and their roles, CEO ZilaPachayat: Position and role.
  - Block level: Organizational Hierarchy (Different departments),
  - Village level: Role of Elected and Appointed officials,
  - Importance of grass root democracy

- Election Commission:
  - Election Commission: Role and Functioning. Chief Election Commissioner and Election Commissioners.
  - State Election Commission: Role and Functioning.
  - Institute and Bodies for the welfare of SC/ST/OBC and women

### **Reference Books**

2. Dr. S. N. Busi, Dr. B. R. Ambedkar framing of Indian Constitution, 1st Edition, 2015.
3. M. P. Jain, Indian Constitution Law, 7th Edn., Lexis Nexis, 2014.
4. D.D. Basu, Introduction to the Constitution of India, Lexis Nexis, 2015.

## **PEDAGOGY STUDIES**

- Introduction and Methodology:
  - Aims and rationale, Policy background, Conceptual framework and terminology.
  - Theories of learning, Curriculum, Teacher education.
  - Conceptual framework, Research questions.
  - Overview of methodology and Searching.
  
- Thematic overview: Pedagogical practices are being used by teachers in formal and informal classrooms in developing countries.
  - Curriculum, Teacher education.
  
- Evidence on the effectiveness of pedagogical practices.
  - Methodology for the in depth stage: quality assessment of included studies.
  - How can teacher education (curriculum and practicum) and the school curriculum and guidance materials best support effective pedagogy?
  - Theory of change.
  - Strength and nature of the body of evidence for effective pedagogical practices.
  - Pedagogic theory and pedagogical approaches.
  - Teachers' attitudes and beliefs and Pedagogic strategies.
  
- Professional development: alignment with classroom practices and followup support.
  - Peer support.
  - Support from the head teacher and the community.
  - Curriculum and assessment.
  - Barriers to learning: limited resources and large class sizes.
  
- Research gaps and future directions.
  - Research design.
  - Contexts.
  - Pedagogy.
  - Teacher education.
  - Curriculum and assessment.
  - Dissemination and research impact.

## **STRESS MANAGEMENT BY YOGA**

- Definitions of Eight parts of yoga. ( Ashtanga )
- Yam and Niyam.  
Do`s and Don`t`s in life.
  - i) Ahinsa, satya, astheya, bramhacharya and aparigraha
  - ii) Shaucha, santosh, tapa, swadhyay, ishwarpranidhan
- Asan and Pranayam
  - i) Various yog poses and their benefits for mind & body
  - ii) Regularization of breathing techniques and its effects-Types of pranayam

# PERSONALITY DEVELOPMENT THROUGH LIFE ENLIGHTENMENT SKILLS

Neetisatakam-Holistic development of personality

- Verses- 19,20,21,22 (wisdom)
- Verses- 29,31,32 (pride & heroism)
- Verses- 26,28,63,65 (virtue)
- Verses- 52,53,59 (dont's)
- Verses- 71,73,75,78 (do's)
  
- Approach to day to day work and duties.
- Shrimad BhagwadGeeta : Chapter 2-Verses 41, 47,48,
- Chapter 3-Verses 13, 21, 27, 35, Chapter 6-Verses 5,13,17, 23, 35,
- Chapter 18-Verses 45, 46, 48.
  
- Statements of basic knowledge.
- Shrimad Bhagwad Geeta: Chapter2-Verses 56, 62, 68
- Chapter 12 -Verses 13, 14, 15, 16,17, 18
- Personality of Role model. Shrimad Bhagwad Geeta: Chapter2-Verses 17, Chapter 3-Verses 36,37,42,
- Chapter 4-Verses 18, 38,39
- Chapter18 – Verses 37,38,63
